

# Table of Contents

## Preface

*Alan R. Bishop, Division Leader and Paul J. Dotson, Deputy Division Leader.....* iii

## Equation of State

<b>Equation of State Developments in T-1.....</b>	<b>2</b>
<i>Nicolas Bock, Leonid Burakovskiy, Eric Chisom, Scott Crockett, Giulia De Lorenzi-Venneri, Tinka Gammel, Denise George, Carl Greeff, J.D. Johnson, Travis Peery, Sven Rudin, and Duane Wallace, T-1</i>	
<b>Multiphase Equations of State for the SESAME Database .....</b>	<b>4</b>
<i>Eric D. Chisom, Denise C. George, and Carl W. Greeff, T-1</i>	
<b>Continuum Models for Multiphase EOS .....</b>	<b>6</b>
<i>Carl W. Greeff, T-1</i>	
<b>Calculated Effects of Ga on the Pu Lattice after the <math>\delta</math> to <math>\alpha</math> Transformation.....</b>	<b>8</b>
<i>Sven P. Rudin and John M. Wills, T-1</i>	
<b>Phonons from Density Functional Theory for Equations of State.....</b>	<b>10</b>
<i>Sven P. Rudin, J. D. Johnson, and John M. Wills, T-1</i>	
<b>Vibration-Transit Theory for Time Correlation Functions in Liquids: A Model for Transits.....</b>	<b>12</b>
<i>Giulia De Lorenzi-Venneri and Duane Wallace, T-1</i>	
<b>Low-Pressure Equation of State of Polymers .....</b>	<b>14</b>
<i>Bradford E. Clements, T-1</i>	

## Condensed Matter, Materials Science, and Chemistry

<b>Heterogeneous Nucleation in Martensitic Transformations .....</b>	<b>18</b>
<i>Turab Lookman and Avadh Saxena, T-11; and Rajeev Ahluwalia, Institute for Materials Research and Engineering, Singapore</i>	
<b>Local Deformation Behavior of Metallic Polycrystals .....</b>	<b>20</b>
<i>Curt A. Bronkhorst and B. L. Hansen, T-3</i>	
<b>A Strength Model for Materials with Phase Transformations .....</b>	<b>22</b>
<i>Eric N. Harstad, Francis L. Addessio, and Q. Ken Zuo, T-3; and Carl W. Greeff, T-1</i>	
<b>Instabilities in Cellular Solids and the Role of Dispersity in Geometric Structure.....</b>	<b>24</b>
<i>Mark W. Schraad, T-3</i>	
<b>Stochastic Multiscale Material Modeling .....</b>	<b>26</b>
<i>Todd O. Williams, T-3</i>	

<b>Simulation and Analysis of Real Foam Microstructures .....</b>	<b>28</b>
<i>Scott Bardenhagen, Andrew Brydon, and Lucas Wharton, T-14</i>	
<b>Dynamic Response of HMX Through the <math>\beta</math>-<math>\delta</math> Phase Transition.....</b>	<b>30</b>
<i>Bradford E. Clements, Eric M. Mas, JeeYeon N. Plohr, Axinte Ionita, T-1; and Francis L. Addessio, T-3</i>	
<b>Micromechanics Models for Plastic-Bonded High Explosives:</b>	
<b>Recent Developments .....</b>	<b>32</b>
<i>Bradford E. Clements and Eric M. Mas, T-1; and Curt A. Bronkhorst and Todd O. Williams, T-3</i>	
<b>Coupling Grain Scale and Bulk Mechanical Response of PBXs via Numerical Simulation.....</b>	<b>34</b>
<i>Scott Bardenhagen and Andrew Brydon, T-14</i>	
<b>Atomistic Studies of Quasi-Static Compression in <math>\alpha</math>-HMX.....</b>	<b>36</b>
<i>Eugenio Jaramillo and Thomas D. Sewell, T-14; and Alejandro Strachan, Purdue University</i>	
<b>A Mechanism for the Mullins Effect.....</b>	<b>38</b>
<i>David E. Hanson, T-12; and Marilyn Hawley and Robert Houlton, MST-8</i>	
<b>Update on the Aging of PBX-9501 via Hydrolysis.....</b>	<b>40</b>
<i>Brian K. Kendrick and Russell T Pack, T-12</i>	
<b>Update on the Aging of PBX-9501 via Free-Radical Oxidation.....</b>	<b>42</b>
<i>Joel D. Kress, T-12</i>	
<b>Large and Rapid Deformation of Dense Particulate Composite .....</b>	<b>44</b>
<i>Xia Ma, Qisu Zou, Duan Z. Zhang, W. Brian VanderHeyden, T-3; and Nely Padial-Collins, CCS-2</i>	
<b>Finite Element Method Calculations on Statistically Consistent Microstructures of PBX-9501.....</b>	<b>46</b>
<i>Eric M. Mas, Bradford E. Clements, and Axinte Ionita, T-1; and Paul D. Peterson, DX-2</i>	
<b>Dynamically Driven Phase Transformations in Damaged Composite Materials .....</b>	<b>48</b>
<i>JeeYeon N. Plohr and Bradford E. Clements, T-1; and Francis L. Addessio, T-3</i>	
<b>Molecular Bridging and Mechanical Properties .....</b>	<b>50</b>
<i>Kim Ø. Rasmussen, T-11; Edward M. Kober, T-14; and R.J. Spontak, North Carolina State University</i>	
<b>Coulomb Explosion Mechanisms for Ion Damage .....</b>	<b>52</b>
<i>Cynthia J. Olson Reichhardt, T-12</i>	
<b>Electronic Structure Calculations with Dynamical Mean Field Theory in <math>\delta</math>-Pu .....</b>	<b>54</b>
<i>Jian-Xin Zhu, T-11; M. D. Jones, University of Buffalo; R. C. Albers, T-11; and J. M. Wills, T-1</i>	

<b>An Implicit Algorithm for a Rate-Dependent Brittle Damage Model .....</b>	<b>56</b>
<i>Q. Ken Zuo, T-3</i>	
<b>A Rate-Dependent Damage Model for Brittle Materials under Dynamic Loading .....</b>	<b>58</b>
<i>Q. Ken Zuo and Francis L. Addessio, T-3; and John K. Dienes, T-14</i>	
<b>A Two-Component Element for Modeling Strain Localization in Materials.....</b>	<b>60</b>
<i>Q. Ken Zuo and Paul J. Maudlin, T-3</i>	

## Shock and Detonation Physics

<b>Multibillion-Atom Molecular Dynamics Simulations of Shockwave Phenomena on BlueGene/L.....</b>	<b>64</b>
<i>Timothy C. Germann and Brad Lee Holian, X-1; Kai Kadau and Peter S. Lomdahl, T-14</i>	
<b>Direct Observation of the <math>\alpha</math>-<math>\epsilon</math> Transition in Shock-Compressed Iron via Nanosecond X-ray Diffraction .....</b>	<b>66</b>
<i>Kai Kadau, T-14; Timothy C. Germann, X-1; Peter S. Lomdahl, T-14; Brad L. Holian, X-1; D.H. Kalantar and J. Hawrelak, Lawrence Livermore National Laboratory; K. Rosolankova and J.S. Wark, University of Oxford</i>	
<b>The Rayleigh-Taylor Instability via Direct Simulation Monte Carlo.....</b>	<b>68</b>
<i>John L. Barber and Kai Kadau, T-14; Timothy C. Germann, X-1; Peter S. Lomdahl, T-14; Brad L. Holian, X-1; and Berni Alder and Ed Alley, Lawrence Livermore National Laboratory</i>	
<b>Inelastic Deformation in Shock Loaded HMX.....</b>	<b>70</b>
<i>Eugenio Jaramillo and Thomas D. Sewell, T-14; and Alejandro Strachan, Purdue University</i>	
<b>Detonation Wave Profile in PBX-9501 .....</b>	<b>72</b>
<i>Ralph Menikoff, T-14</i>	
<b>Dynamic Behavior of Copper and Other Metals at Extreme Loading Rates.....</b>	<b>74</b>
<i>Alek Zubelewicz, T-3</i>	

## Computational Science and Fluid Dynamics

<b>A 2-D Model to Simulate Convection and Phase Transitions Accurately .....</b>	<b>78</b>
<i>Katherine J. Evans and Dana A. Knoll, T-3</i>	
<b>Multiphysics Time Integration and Long Time Integration Error .....</b>	<b>80</b>
<i>Dana A. Knoll, Vincent A. Mousseau, Rick M. Rauenzahn, Katherine J. Evans, T-3; and Luis Chacón, T-15</i>	
<b>Acoustic Wave Propagation in a Particle-Laden Gas .....</b>	<b>82</b>
<i>Peter J. O'Rourke, Michael C. Cline, and Manjit S. Sahota, T-3</i>	
<b>Temporal Accuracy of the Solution of Radiation Hydrodynamics Equations.....</b>	<b>84</b>
<i>Rick M. Rauenzahn, Vincent A. Mousseau, and Dana A. Knoll, T-3</i>	
<b>Permeating Fluid Effects in Cellular Material Systems under Dynamic Loading .....</b>	<b>86</b>
<i>Mark W. Schraad and Francis H. Harlow, T-3</i>	

<b>Plug and Play Approach to Verification and Validation.....</b>	<b>88</b>
<i>Giovanni Lapenta, T-15</i>	
<b>Moment-of-Fluid Interface Reconstruction.....</b>	<b>90</b>
<i>Vadim Dyadechko and Mikhail Shashkov, T-7</i>	
<b>New Discretization Methodology on Generalized Polyhedral Meshes .....</b>	<b>92</b>
<i>Franco Brezzi, Konstantin Lipnikov, and Mikhail Shashkov, T-7</i>	
<b>Verification for Adaptive Mesh Refinement Code .....</b>	<b>94</b>
<i>Shengtai Li and Mikhail J. Shashkov, T-7, and William J. Rider, X-1</i>	
<b>Efficient Smoothing of 3-D Unstructured Grids.....</b>	<b>96</b>
<i>Markus Berndt and J. David Moulton, T-7, and G. A. Hansen, South Dakota School of Mines and Technology</i>	

## Nuclear Physics

<b>Calculation of Neutron Spectra in <math>\beta</math>-delayed Neutron-Emission.....</b>	<b>100</b>
<i>Toshihiko Kawano, Peter Möller, and William B. Wilson, T-16</i>	
<b>Determination of Am Fission Barriers from Calculated High-Dimensional Potential-Energy Surfaces .....</b>	<b>102</b>
<i>Peter Möller, T-16</i>	
<b>The Reaction <math>^{10}B(p, \alpha) ^7Be</math> .....</b>	<b>104</b>
<i>Philip R. Page, T-16</i>	
<b>Radiochemical Diagnostics of Fission and Fusion Neutrons using Gold Detectors.....</b>	<b>106</b>
<i>Shannon T. Cowell and Anna C. Hayes, T-16</i>	
<b>Domestic Nuclear Event Attribution: Proliferant Devices Based on Reactor-Grade Fuel .....</b>	<b>108</b>
<i>Anna C. Hayes, T-16; and Gerard Jungman, T-6</i>	
<b>Developing Advanced Models of Nuclear Pre-Initiation for NEST Render-Safe Exercises .....</b>	<b>110</b>
<i>Anna C. Hayes, T-16; and Gerard Jungman, T-6</i>	

## **Atomic and Plasma Physics**

<b>Improvements to the Finite-Temperature Average-Atom Model .....</b>	<b>114</b>
<i>James Colgan, George Csanak, and Lee A. Collins, T-4; Christopher J. Fontes, X-1</i>	
<b>Triple Photoionization of Li and Be .....</b>	<b>116</b>
<i>James Colgan, T-4</i>	
<b>Mean-Field Statistical Theory of Finite Quantum Systems with Applications to Hot Dense Plasmas .....</b>	<b>118</b>
<i>Sergey A. Ponomarenko, George Csanak, David P. Kilcrease, and Manolo Sherrill, T-4</i>	
<b>Spatial Soliton-like Similaritons and Soliton Amplification.....</b>	<b>120</b>
<i>Sergey A. Ponomarenko, T-4; and Govind P. Agrawal, University of Rochester</i>	
<b>Mixing UTA and Detailed Line Treatment for Mid-Z Opacity Calculations .....</b>	<b>122</b>
<i>Stephane Mazevet and Joseph Abdallah, Jr., T-4</i>	
<b>ATOMIC Simulations for a Germanium Laser-Produced Plasma .....</b>	<b>124</b>
<i>Joseph Abdallah, Jr., T-4; Christopher J. Fontes, X-1; James Colgan, T-4; D. Batani, University of Milan; and A. Ya. Faenov, MCISDC, Russia</i>	
<b>Spectroscopic Characterization of an Ultrashort Laser Driven Ar Cluster Target ....</b>	<b>126</b>
<i>Manolo Sherrill, Joseph Abdallah, Jr., and George Csanak, T-4; Evan Dodd, X-1; Yuji Fukuda, JAERI, Kyoto, Japan; and Anatoly Faenov, VNIIFTRI Moscow, Russia</i>	
<b>Opacity Code Comparison Workshop (WorkOp) September 2005 .....</b>	<b>128</b>
<i>David Kilcrease, Manolo Sherrill, Norm Magee, and John Keady, T-4; and Christopher Fontes and H-L Zhang, X-1</i>	
<b>OVID: A Graphical User Interface Tool for Visualizing Opacities.....</b>	<b>130</b>
<i>Leslie Welser, T-4</i>	

## **Astrophysics**

<b>Inertial Fusion: A Possible New Program .....</b>	<b>134</b>
<i>Stirling Colgate, T-6; Walt Atchison and Hui Li, X-1; and Steve Slutz, Sandia National Laboratories</i>	

## **Predictive Science and Uncertainty Quantification**

<b>A New Method for Compositing Reaction History Data.....</b>	<b>138</b>
<i>Timothy C. Wallstrom, T-13</i>	

<b>Author Index....</b>	<b>140</b>
